➤ Company Description & service

LoxkMe was located in Sathorn, Bangkok by three co-founders: Waris, Pattanan, and Thanakij. LoxkMe employs about a thousand people who are full of efficiency, and potential to help clients maintain their data. LoxkMe is a company where clients can rest assured that their data is kept safe and secure. On behalf of LoxkMe, we are committed to securing and maintaining client information in every case, to facilitate our customers with competence, efficiency, and responsibility of all our employees. There are many cybersecurity resources on our company website, we also create and deliver knowledge to help clients and organizations by providing total solutions and including expert advice. Our core service is to maintain a database system for clients and organizations who require system administration from the beginning to the end of the system maintenance. Another interesting service of LoxkMe is cooperation with hospitals. Certainly, keeping patient information is a significant matter for the hospital, thus they require LoxkMe to handle that aspect. At the time the patient receives blood test results, their data is stored in the database, and use a network system forward data by having to go through the approval from the hospital before the result can be transmitted along with LoxkMe security's system. You may find furthermore

information or would like to inquire about our services via LoxkMe's website, and email address.
